

Platts U.S. Land Rig Demand Forecast

More than just a report; an investment in your future.

Plan and budget with added confidence. The Platts U.S. Land Rig Demand Forecast is a detailed analysis that takes into consideration several variables, including: macro economic conditions, drilling technology, demand for oil and gas, and CAPEX reporting. Broken down by region, you'll have actionable details on when and where rig demand is forecasted to occur.

Subscription includes:

- September release of PDF report for immediate reading and a bound hardcopy sent by mail
- Complete datasets (.xlsx format) with all supporting data
- Exclusive access to webinars with live Q&A
- Email updates and commentary sent direct from the analysts
- April rig demand forecast update report

What's inside:

- Three year forecast of land rig demand by region and by month
- Three year historical look-back of active rig counts by region and by month
- Analytic commentary on factors impacting future operator behaviors, macroeconomics, technology, regulations, geopolitics and commodity future prices
- Complete with charts and tables
- Access to the analysts
